OCCUPATIONAL THERAPY

What do they do?

Pediatric occupational therapy helps children gain independence while also strengthening the development of fine motor skills, sensory motor skills, and visual motor skills that children need to function and socialize.

OTs help children perform daily activities they may find challenging by addressing sensory, social, behavioral, motor, and environmental issues.

PHYSICAL THERAPY

What do they do?

Pediatric Physical Therapists help kids improve their range of motion, strength, flexibility, and movement patterns. Physical therapy helps improve gross motor skills. PTs see children for a variety of different reasons, including bone/muscle issues, sports-related injuries, or genetic, brain, spine, or nerve disorders. Pediatric Physical Therapists help make everyday activities easier for kids and help improve gross motor skills.
